ABOUT US

We are "Shenzhen SMART Supply Chain Ltd.", a legal company in Hong Kong SAR and Shenzhen, China.

We are an enterprise specializing in the production and sales of AdBlue, AUS40 and Prilled Urea in China, Our annual production capacity is 1 million tons at least, We have successfully passed the certification of the VDA, REACH, API, ISO9001, ISO14001, ISO22241, GB/T29490, TS16949..., Our products are exported to the EU, US, South Africa, South Korea and Japan...

We have a complete industrial chain of AdBlue/DEF/AUS32/AUS40, from **RAW MATERIALS** (Prilled Urea) to **PRODUCTION** (Production Line and Equipment) to **DELIVERY** (End Products 10L/20L/200L/1000L/Bulk) and **DISPENSER**. Your inquiries are warmly welcome.

Sincerely yours,

RAW MATERIALS

We provide you high-quality of Prilled Urea for making AdBlue/DEF/AUS32/AUS40 from China.

1. Product Name

Prilled Urea/ Technical Grade Urea (TGU)

One 20ft container can hold up to 20 tons, and one 40ft container can hold up to 26 tons.

2. Specification

PRODUCTION

A complete AdBlue/DEF/AUS32/AUS40 production line includes but is not limited to the following equipment:

1. Water purification equipment
2. Dispersed heated emulsification reaction tank
3. Automatic feeding machine
4. Fully automatic filling line
5. Automatic capping machine
6. Automatic inkjet printer
7. Automatic labeling machine.

We have two machines for you to choose from:

1. Integrated Smart AdBlue Production Facility (All-In-One)
2. Smart AdBlue Production Line (Split Machine)

➤ Integrated Smart AdBlue Production Facility (All-In-One)

1. Overview

2. Advantages Of Equipment

- **Advanced manufacturing technology**

All equipment parts adopts international top brands such as Dow membrane, Nanfang pump etc. The equipment operates stably and long-lasting. The harsh factory test conditions, strict calibration process of the metering sensors ensures high accuracy, high safety and stability.

- **Advanced ultrapure water process**

Above 10 grade filtration and electro deionization membrane stack process, make the de metallization ionization of pure water is up to 99999%, ensures the cleanliness and non metallization of urea solution.

The on-line after-sales service platform updates the replacement of filter element and filter screen in real time, ensures stable operation, and long-term stability of ultra pure water quality.

- **Advanced IOT technology**

Real-time Sensor monitoring is adopted to ensure the lowest faults rate of equipment. Real-time failure analysis in the background, consumables replacement reminder, quality sensor monitoring of urea solution, active early warning and telephone reminder of background professional customer service, guarantees the quality of urea solution.

- **High precision urea solution production**

Automatic proportioning technology, extremely high-precision sensor technology, automatic adjustment of product quality, and early -fault -warning system are adopted to ensure the quality of urea solution.

- **Experienced after-sales team and standardized service process**

We provide customers full process after-sales service support. Professional technical engineers support and fast respond to customers requests.

3. Equipment Composition

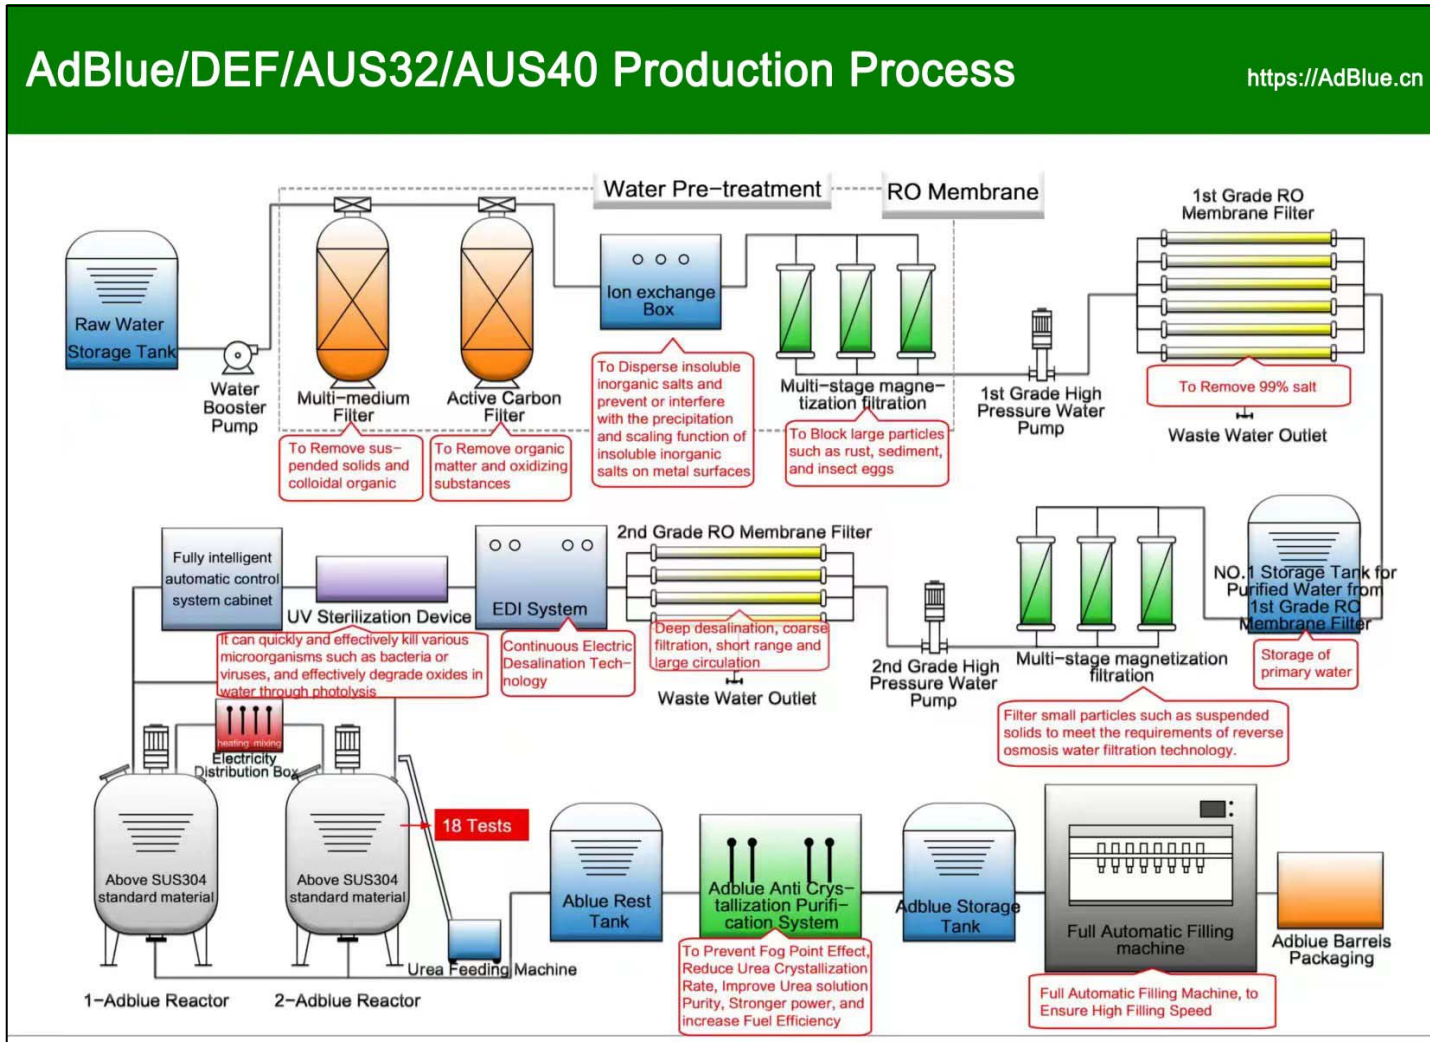

Optional: Automatic Feeding System, Ultra Purification System, Bottling System

4. Product List

Model No.	Capacity	Configuration
SMT50	150Kg/Hour - 300Kg/Hour	Filter element + RO + Resin
SMT150	400Kg/Hour - 500Kg/Hour	Filter element + Two-stage RO + Resin
SMT150E	400Kg/Hour - 500Kg/Hour (EDI)	Filter element + Two-stage RO + EDI
SMT300	750Kg/Hour - 1000Kg/Hour (EDI)	Filter element + Two-stage RO + EDI

➤ Accessories and Kits

Water Purification Equipment

Multi-medium Filter, Active Carbon Filter, Multi-stage Magnetized Filter
Two-stage RO + EDI

Dispersed Heated Emulsification Reaction Tank

Automatic heating reaction kettle
Rotating speed 1000 rpm

Automatic Feeding Machine

304 stainless steel feeding machine can feed industrial pellets.

Fully Automatic Filling Line

Filling range 500-5000ml
Filling accuracy $\pm 1.5\text{ml}/500\text{ml}$
Approximately 800-1,000 bottles per hour

Automatic Inkjet Printer

The speed can reach 75 meters/minute, the maximum printing speed is 12.7mm, and the maximum resolution is 600DPI. It can print metal, plastic, wood, aluminum foil, cartons, etc.

Automatic Labeling Machine

Cans Length : 50mm - 300mm

Cans Width : 50mm - 220mm

Cans Height : 80mm - 400mm

Label Length : 40mm - 285mm

Label Width : 40mm - 200mm

Labeling speed: 20 - 30 pieces / minute

➤ Success Case

DELIVERY

We're an enterprise specializing in the production and sales of AdBlue/DEF/AUS32/AUS40 in China, Our annual production capacity is 1 million tons at least, We have successfully passed the certification of the VDA, REACH, API, ISO9001, ISO14001, ISO22241, GB/T29490, TS16949..., Our products are exported to the EU, US, South Africa, South Korea and Japan...

We can guarantee that our quality is definitely the best, we use the two technologies of "Ultrapure filtration system" and "Nanoemulsion" to effectively remove crystal scaling inducers and reduce the content of metal ions, so that the purity of AdBlue/AUS32/AUS40 produced by us is higher, and the crystallization blockage of the SCR system is reduced. Because of the high-quality AdBlue/AUS32/AUS40 we produce, we have also become the OEM of many well-known brands, the technology and equipment in those photos below are our own patents and plant:

➤ AdBlue, DEF, AUS32

1. Packaging

1) Flexi tank bulk, one 20ft container can hold up to 23 tons.

2) 1,000L IBC tank, one 20ft container can hold up to 20 tanks, and one 40ft container can hold up to 26 tanks.

3) 10L, one 20ft container can hold up to 1,700 bottles (No pallet) and 1,300 bottles (With pallet).

4) 20L, one 20ft container can hold up to 800 bottles (No pallet) and 630 bottles (With pallet).

Conclusion: the quality of urea solution meet the standard of AdBlue, is better than ISO022241 standard specification					

➤ AUS40, Marine Urea Solution

We produce and deliver AUS40 to any port in China or any safe port in the world.

In China, this is no problem for us, and is also what we are good at, the loading capacity of this liquid tank truck is 33 tons.

If you have any customers in China need the AUS40, we can do it on your behalf.

➤ AdBlue Anti-Crystallization Additive

1. Properties

- 1) Prevents the formation of crystals on components in the AdBlue system.
- 2) Delivers a cleaning effect on all components in the SCR System by dissolving light crystallization in the AdBlue Tank, pump unit & Injector.
- 3) Improves SCR/AdBlue operation.
- 4) Avoids costly repairs to the SCR/AdBlue System.
- 5) Eliminates breakdown & downtime due to AdBlue crystallization.
- 6) Prolongs the life of components in the AdBlue system.

2. Packaging

1) 300ML, 24 bottles per box

2) 20L and 1000L IBC

DISPENSER

We have a variety of AdBlue Dispenser, and can also customize production according to your requirements.

AdBlue Dispenser for IBC

Flow range: 35L/min
Work pressure: 1.6 Bar
Motor speed: 1750 rpm
Power: 220V/230V

EPDM hose, in 2m and out 4m, all are made of stainless steel

AdBlue Dispenser for Drums

Flow range: 14L/min
Out hose: 2m

Power: 12V DC/220V/230V AC

Suitable for: AdBlue, water, antifreeze, washer fluid, mild cleaning agents and mild herbicide

Stand AdBlue Dispenser

Flow range: 35L/min

In hose: 1m

Out hose: 10m

Power: 12V DC/220V/230V AC

Quantitative, fixed filling, QR code and Card payment

Hanging AdBlue Dispenser

Flow range: 35L/min

In hose: 1m

Out hose: 10m

Power: 12V DC/220V/230V AC

Quantitative, fixed filling, QR code and Card payment

Stand AdBlue Dispenser

Size: 1500*500*400(mm)

Booster pump pressure: 1.5Mpa

Voltage: AC (110V/220V/230V), DC12v, 24v

Flow rate: 35L to 50L

Pressure: 25PSI

Medium temperature: ≤60 degrees

Inlet and outlet diameter: 1 inch (32mm)

Transmission medium: automotive urea, water, diesel, engine oil, etc.

Hanging AdBlue Dispenser

Size: 500*500*400(mm)

Booster pump pressure: 1.5Mpa

Voltage: AC (110V/220V/230V), DC12v, 24v

Flow rate: 35L to 50L

Pressure: 25PSI

Medium temperature: ≤60 degrees

Inlet and outlet diameter: 1 inch (32mm)

Transmission medium: automotive urea, water, diesel, engine oil, etc.
